

Instructions:

1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[Exercise 6]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
[Technically the program does things before the user sends an input so this is step 2. The user will enter their guess as to what the answer is to the question]	[The program will use 3 rand.nextInt to generate 2 numbers for a question, and then another one to generate a number between 1-4, and then it will use a loop to check what the random 1-4 number is to apply an operator then apply it to the question]	[The program will first display the question then after the user sends their input it will display a yes or a no]
